

Case Study: UK Airport Hotel

How DRAINZAP removed legacy drain build-up

Overview

- Located within a major UK airport
- High-footfall, around 400 hotel rooms
- Bathrooms experience constant use

The Challenge

- The hotel faced potential issues with drain blockages caused by:
 - Significant hair accumulation
 - Heavy limescale build-up
 - Organic matter within the pipework
- They required a solution that could:
 - Address hidden build-up
 - Reduce manual intervention

The Solution

- Thrive recommended DRAINZAP to clear existing debris from pipework in baths.
- DRAINZAP's foaming action enabled staff to clearly see that the product was active and working within the system.
- The trial was supported on site by the National Account Executive assisting implementation.
- Staff were impressed with the efficacy of the product in restoring flow, with camera images showing the removal of the debris.

"A positive guest experience is a priority for us, and ensuring showers work as they should is a key part of that.

I'm amazed at how quickly DRAINZAP worked and how clean the pipes are."

- Hotel operative

Before: Visible hair trapped with slime around the drain opening

After: Hair & slime eliminated

Before: Drain opening restricted by hair clumps

After: DRAINZAP dissolved hair, ensuring free-flowing drains

The Benefits

- **Effective removal of legacy build up:** DRAINZAP successfully broke down and removed hair, limescale and organic matter.
- **Restored visibility & flow:** Pipework that was previously hidden became clearly visible and clear of debris.
- **Reduced manual maintenance:** DRAINZAP reduces the need for daily removal and cleaning of traps.
- **Fast-acting performance:** Results were achieved quickly.
- **Easy to use:** Site feedback confirmed the product was straightforward to apply with minimal disruptions to current cleaning routines.
- **Improved guest readiness & operational efficiency:** DRAINZAP ensures facilities remain guest-ready while reducing the need for costly and labour-intensive reactive maintenance, freeing up resources to focus on wider cleaning and facilities priorities.

About Thrive

Thrive believes cleaning can be smarter, safer, and better for the planet.

We develop innovative, science-backed biological solutions to tackle the challenges of human-made pollution.

Our groundbreaking products transform how people clean, delivering exceptional performance without compromise. By setting new standards in sustainability, we empower businesses to reduce waste, improve efficiency, stay compliant, and shrink their carbon footprint, all while supporting the regeneration of our planet's ecosystems.
